Alebrijes

### *The new culture of a tradition:*

In 1982, Maria launched to the market her own collections for the very first time. It began with a relaxed – fit clothing line, with a broad color range, ruffles, textures and a generalized concept of one size fits all. Later, as per customers request, she started offering a wide variety of sizes from S – XL and even up to 3X in some styles with the aim of satisfying a larger market by contributing with color and freshness, years of expertise, creativity, passion and love in every garment.

### *A message from our Executive Director:*

*"My creations do not necessarily intend to follow fashion trends, since each person is unique when it comes about seeking harmony, freedom and comfort in the dress. I believe that the fact of having the opportunity of being the creator of a very peculiar style, which personifies casual elegance and that sets itself by its uniqueness, quality, comfort and prettiness, is an extremely enriching experience. "Those who enjoy and adopt my style for themselves, become a big part of my life".*

*The source of a new trend:*

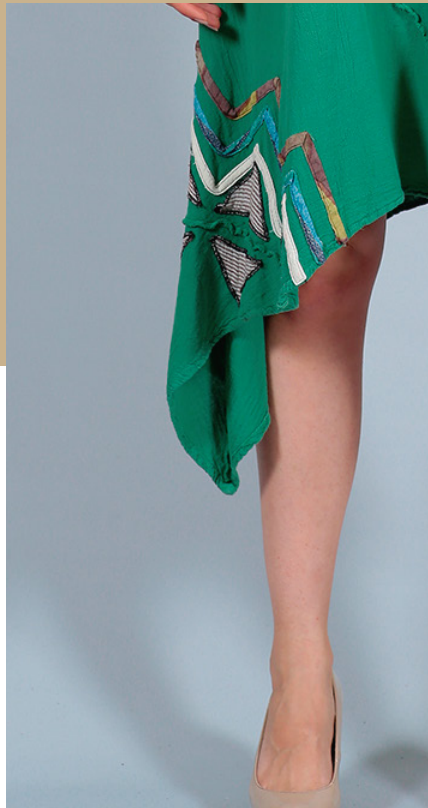

In 1982, María launched to the market her own collections for the very first time. It began with a relaxed – fit clothing line, with a broad color range, ruffles, textures and a generalized concept of one size fits all. Later, as per customers request, she started offering a wide variety of sizes from S – XL and even up to 3X in some styles with the aim of satisfying a larger market by contributing with color and freshness, years of expertise, creativity, passion and love in every garment.

On this occasion, María presents her line Alebrijes; “The alebrije” is a handcraft from the state of Oaxaca, Mexico which represent imaginary beings shaped by physiognomic elements of various animals. The combination of said elements gives life to fantastic animals.

"Alebrijes unique characteristics such as its color, texture, detail and imagination is inspired me to create the line of alebrijes in bright and fun colors, which combined with handcrafted details, enhances the texture of each garment, and takes us to the magic world of Mexican craft and makes each of our models, unique".
